

# Job Opening: Tig Welder Millwright

## Position Overview

The role of Journeyman Tig Welder Millwright is to compliment our current team of technicians and assist Knack's food and beverage customer base with advanced welding, fabrication, and industrial support, to maintain and improve their processing operations. The scope ranges anywhere from day to day maintenance or welding repairs, up to the plant project scale. This takes place on the customer job site or at our shop.

## Required Personal Responsibilities:

- Display Initiative and ability to work self-sufficiently with minimal supervision. Journeyman level experience.
- Ability to be resourceful and independently creative to get the job done under pressure or tight timelines.
- Work within a team environment and maintain a positive attitude.
- Professional, informative, and responsive communication to the manager, staff and customers.
- Interacts with customers to understand their requests or concerns.
- Interacts with customers to provide feedback on job completion or the necessary performance of tasks.
- Must be able to respond to plant emergencies as directed outside of normal working hours.
- Operation, maintenance and repair of responsible tools and equipment.
- High level of integrity.

## Required Technical Skills:

- Understand, install, troubleshoot and maintain various types of food processing equipment including but not limited to: pumps, conveyors, agitators, tanks, exchangers, valving, etc.
- Advanced Journeyman level sanitary stainless steel tig welding experience.
- Journeyman ability to design, fabricate and build basic and/or complex structures, supports or framework.
- Ability to perform oxy fuel and plasma cutting processes.
- Perform safe rigging procedures for lifting or installing various equipment.
- Perform demolition of equipment/systems and the ability to properly isolate, rig and remove safely and in proper sequence.
- Perform preventative maintenance on equipment for readiness and operational capacity.
- Safe operation of forklift and other mobile equipment.
- Modernization and continual improvement of responsible duties.

### Required experience:

- Minimum 5 years related work experience as a journeyman tig welder/millwright.
- Adherence to all customer GMP requirements.
- Ability to follow all safety rules and regulations.
- Advanced journeyman ability in sanitary TIG welding.
- Trade tickets or certifications not necessary, journeyman level personal and technical experience is a must.
